REMARKS

Applicant thanks the Examiner for the careful and thorough examination of the present application, and for the courtesy extended during the telephone interview on June 20, 2006. By this amendment, Claims 1, 10, 15, 21 and 24 have been amended to further clarify the invention as will be discussed in detail below. Claims 1-4, 6-11, 13-17, 19-23, 25-30 and 32-35 remain pending in the application. Favorable reconsideration is respectfully requested.

I. The Claims are Patentable

Claims 1-4, 6-11, 13-17, 19-23, 25-30 and 32-35 were rejected in view of Gagne et al. (U.S. Patent No. 6,212,290) or in view of Abtahi et al. (U.S. Patent No. 5,509,083) taken individually, in combination or in further view of Lu et al. (U.S. Patent No. 5,432,864) or Sibbald et al. (U.S. Patent No. 5,412,463) for the reasons set forth on pages 2-15 of the Office Action. As mentioned above, Claims 1, 10, 15, 21 and 24 have been amended to further clarify the invention. Applicant contends that Claims 1-4, 6-11, 13-17, 19-23, 25-30 and 32-35 clearly define over the cited references, and in view of the following remarks, favorable reconsideration of the rejections under 35 U.S.C. §102 and §103 is requested.

Each of the independent claims includes the use of biometric data comprising selected non-contiguous sets of image pixels from an array of image pixels of an enrollment biometric image, and each non-contiguous set of image pixels includes a plurality of consecutive and colinear image pixels. In other words, a plurality of consecutive and colinear image pixels define a set, and a plurality of sets are selected that are non-contiguous with each other. This combination of

---

claimed. Accordingly, for at least the reasons given above, Applicant maintains that the cited references do not disclose or fairly suggest the invention as set forth in Claims 1, 10, 15, 21 and 29. Furthermore, no proper modification of the teachings of these references could result in the invention as claimed. Thus, the rejections under 35 U.S.C. §102 and §103 should be withdrawn.

It is submitted that the independent claims are patentable over the prior art. In view of the patentability of the independent claims, it is submitted that their dependent claims, which recite yet further distinguishing features are also patentable over the cited references for at least the reasons set forth above. Accordingly, these dependent claims require no further discussion herein.

## II. Conclusion

In view of the foregoing remarks, it is respectfully submitted that the present application is in condition for allowance. An early notice thereof is earnestly solicited. If, after reviewing this Response, there are any remaining informalities which need to be resolved before the application can be passed to issue, the Examiner is invited and respectfully requested to contact the undersigned by telephone to resolve such informalities.

Respectfully submitted,
